WHAT IS MSP? Some questions answered.

MSP is a new, water based paint that resists flaking or peeling because of its outstanding flexibility. It will go straight over most other paints and varnishes including weathered Tar Varnish, Bitumen and Creosote. It is non-yellowing and it cleans up with water.

It does not need a primer Except on ferrous metals - (use BEDEC Gold Metal Primer) or where staining may occur - (use BEDEC Grey Stain Block).
It does not need an undercoat.

It can be used inside, outside and in the garden

- It can be used directly onto most plastics.
- It can be used directly onto wood.
- It can be used directly onto decking.
- It can be used directly onto metal (including radiators).
- It can be used directly onto galvanised metal.
- It can be used directly onto plastic coated steel cladding.
- It can be used directly onto brick and masonry.
- It can be used directly onto terracotta and stone.
- It can be used directly onto plaster.
- It can be used directly onto MDF.
- It can be used directly onto tiles and melamine.

Preparation of all surfaces is very important. Shiny surfaces need to be keyed. Thin the first coat 20-30% with water on porous surfaces.
